## Home theater your way.

Experience home entertainment the way you envision it. In our showroom you can experience lighting control, home theater, media rooms, theater furnishings and accessories, custom cabinetry and multi-room audio. Don't just read about it, *see it, hear it, feel it* for yourself in our showroom.

You won't be overwhelmed with racks of speakers or walls of televisions. After all, that isn't what your living room is like. Our rooms recreate the experience you would have in your own home.

## Looking for quality home entertainment?

We cater to clients who want quality home entertainment. But no matter what your budget you can expect more for your money at Elite Sound and Cinema.

## Big project?

With our extensive experience in the design and implementation of dedicated media rooms and theaters, we can complete the build-out or remodeling of your room in a custom theme or matching your home's decor.

After your project is complete, we show you and your family how to use the new system to provide you with the very best movie experience.

## Small project?

Not every project needs to be a dedicated theater. Perhaps you just need to replace an old television or upgrade your speakers with new ones in one of our 30 different wood finishes.

We find all aspects of this work exciting and gain real satisfaction from helping our clients get what they want and need in home entertainment.

Come see our showroom, call us, visit the website or email us at [info@elitesoundandcinema.com](mailto:info@elitesoundandcinema.com)

## Quality doesn't cost. It pays.

We carry many lines of select equipment, home furnishings and accessories that offer *your* standard of quality and performance and deliver it at a great value. If we don't carry a particular brand...there is a reason for it. We only sell what we believe in such as:

- JM Labs/Focal
- NAD
- Toshiba
- Denon
- RBH Sound
- Simaudio
- Elan
- Parasound

## One touch control.

Clear the pile of remote controls from the coffee table with a handheld touch screen remote. One touch and all components of your home theater will be ready. It's not difficult, we'll set it up and show you how.

## Your acoustics.

The most overlooked factor in home entertainment today is room acoustics. We can help you conduct an acoustical survey of your site and determine if your project would benefit from any acoustical changes.

## Are you building or remodeling?

Pick up one of our free Pre-Construction Guides to guide you through:

- wiring for lighting control
- home automation
- multi-room audio
- telephone
- television
- computer networking
- surround sound

Learn how treating your walls with acoustical insulation before completing the drywall will

enhance the sound in your room and dampen sound transmission throughout the rest of your house. The guide also details our professional design process so you know what to expect.

## Get comfy.

Sit back in our theater seating and decide which leather or fabric samples will look best in your home. Discover your options, we can provide:

- theater seating
- ticket booths
- popcorn carts
- movie memorabilia and posters
- wall accents

At Elite Sound and Cinema, our clients don't just buy products, they work with our knowledgeable staff to create the perfect entertainment solution, the one that's right for them.
